Problem

1

Limits access to information

Readers are unable to access articles due to recurring paywalls

2

Hurts revenue stream of publishers

Users tend to use ad-blockers and are demotivated to read articles

3

Subscription fatigue

Smaller news publishers rely on ad revenue and low-volume subscriptions

Solution

Enabling micro-payments for digital content via paypal-style gateways

Improved experience and accessibility to restricted articles for readers

Increase in subscription revenue generated for publishers

Help readers avoid high cumulative costs of multiple news subscriptions

User Persona and Feedback

Jerry

Age group	18 to 36
Annual household income	\$100-200k+
Role or occupation	College student young professional
Reading interests	News, entertainment

Anonymous survey of 26 respondents

All respondents live in **CA**
Average age of respondents = **21**

<2

Average number of
subscriptions owned

59.1%

own a news
subscription

0%

believe subscriptions
are overpriced

72.7%

disable ad-blockers to
access sites

Value Prop and Competitive Analysis

Ease of payment

Fast and straightforward for readers to subscribe and pay

Revenue growth

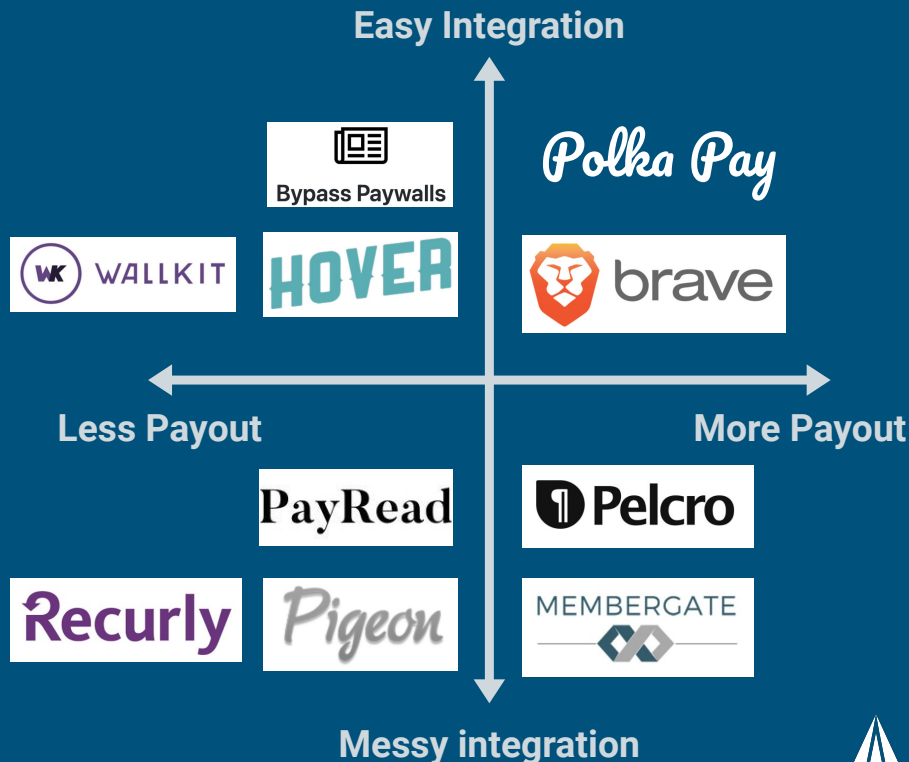

Big and small news publishers boost their revenue with our payout model

Painless integration

Publisher downloads API and access token, embeds module into website's paywall

Security and ownership

Readers and publishers keep track of secure transactions in a dashboard

Business and Revenue Model

- Non-subscribers hit a paywall when accessing an article that they have not previously purchased.
- Paywall prompts user to either purchase subscription with the publisher or **purchase access to the individual article via PolkaPay**
- Side-by-side options provides optionality for readers, while ensuring that PolkaPay does not cannibalize publishers' existing subscription packages
- Average fee per unit: PolkaPay charges publishers a 0.5% transaction fee for each purchase
 - Alternatively, this could be pitched to publishers as a baked-in fee that readers pay

Blockchain Usage / Web 3.0 System Architecture

- **Processing fees** make it difficult to implement using traditional currencies (e.g. USD)
 - Industry standard is 2.9% + 30 cents per transaction
 - Financially unsustainable to charge a nominal rate for access to single articles in USD
- **Blockchain** allows users to maintain **ownership** of their identity and data, and not place trust in an entity
- **Polkadot bridges** to connect and communicate with external networks like Ethereum and Bitcoin
- Used payment channels/rollups (**layer 2 solutions**) for higher scalability, lower fees, and higher gas efficiency
- Added **Celer SDK** to Polkadot to leverage layer-2 scaling platforms and allow for high transaction throughput in order to handle lots of volume

Celer

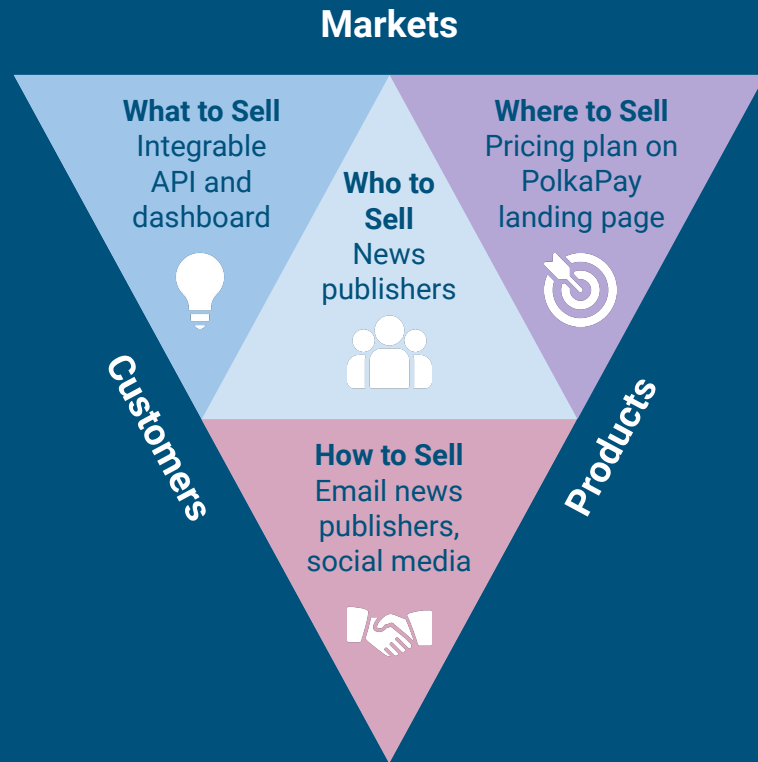

Go to Market Strategy

Focus

B2B sales will be much more difficult than B2C, so we will first market to publishers

Rationale

Naturally, this will make it easier to drive demand, as we will be able to create immediate value for readers by providing a variety of content

Revenues / Expenses Over Time

	2021	2022	2023	2024
Revenue	\$350,000.00	\$900,000.00	\$1,800,00.00	\$3,300,000.00
Cost of Articles Sold	\$262,500.00	\$630,000.00	\$1,080,000.00	\$1,650,000.00
Gross Profit	\$87,500.00	\$270,000.00	\$720,000.00	\$1,650,000.00
Wages	\$500,000.00	\$500,000.00	\$700,000.00	\$1,500,000.00
Marketing	\$10,000.00	\$20,000.00	\$40,000.00	\$60,000.00
SG&A	\$1,000.00	\$5,000.00	\$10,000.00	\$15,000.00
Total Expenses	\$511,000.00	\$525,000.00	\$750,000.00	\$1,575,000.00
Net Profit	-\$423,500.00	-\$255,000.00	-\$30,000.00	\$75,000.00
